

Khalil Ibrahim

Education

University of Birmingham | Birmingham, United Kingdom

Sept 2024 – Sept 2025

MSc Data Science

- First Class Honours

University of Birmingham | Birmingham, United Kingdom

Sept 2020 – July 2024

MEng Civil Engineering

- 2:1 (Upper Second-Class Honours)

Lycée Prince de Liège de Kinshasa | Kinshasa, Democratic Republic of Congo

Sept 2013 – July 2019

High School Diploma

- Recipient of the **Leadership Prize** and **Science Excellence Prize**
- Achieved an overall final grade of **19.0/20**

Related Work Experience

Data Literacy Academy | Birmingham, UK

Jan 2026 - Present

Data Analyst Intern

- Work within the RevOps and Data team to manage, review, and correct data in HubSpot, improving CRM accuracy and supporting smoother business operations.
- Perform data quality checks and maintain sales and customer records to support reporting, pipeline visibility, and operational decision-making.
- Build practical experience in HubSpot CRM, Revenue Operations, data governance, sales operations, and analytical problem-solving.

University of Birmingham Estates Team | Birmingham, UK

Jan 2024 - Jul 2024

BIM & Digital Delivery Intern

- Conducted FM-readiness and information quality assurance of a campus BIM model in Autodesk Tandem within a Common Data Environment.
- Created and maintained issue registers and data-gap logs, supporting the resolution of missing, incomplete, and inconsistent asset information.
- Developed skills in BIM, digital twins, information governance, ISO 19650-aligned checking, and stakeholder coordination.

Milvest / Miller Holding | Kinshasa, DR Congo

Apr 2022 - May 2022

Assistant Site Manager Intern

- Assisted with daily site coordination on a large-scale government finance complex, supporting site routines and delivery activities.
- Participated in health & safety activities, including toolbox talks and safety walks, to reinforce safe working practices on site.
- Gained practical exposure to construction site management, team coordination, and site safety procedures in a live project environment.

Academic Courses and Projects

Data Science Group Project

Jan 2025 – Apr 2025

- Led a group data science project as Team Leader, applying project management techniques to coordinate tasks, manage deadlines, and support effective team collaboration.
- Applied data science methods including data cleaning, exploratory analysis, feature engineering, and predictive modelling to solve a real-world occupancy detection problem using environmental sensor data.

Final Year Project: Cognitive Digital Twin for Building Energy & Operations

Jan 2025 – Apr 2025

- Designed and developed a cognitive digital twin for a university office space to improve building energy performance through occupancy-aware HVAC control.
- Led the integration of environmental sensor data, occupancy prediction, and HVAC simulation within EnergyPlus to evaluate proactive energy optimization strategies.
- Strengthened skills in digital twins, IoT systems, machine learning, reinforcement learning, simulation, and data-driven decision-making through an independent final year project.

Extracurricular Activities

Running Backs Coach, Birmingham Lions American Football Team

Sep 2023 - Present

- Lead the development of players by coaching technical skills, discipline, and positional understanding in a competitive team environment.
- Strengthen leadership, mentoring, and communication skills through supporting athlete performance and contributing to the wider coaching setup.

Senior Student Representative, School of Engineering

Sep 2022 – Jul 2024

- Represented student views in meetings with academic staff, helping communicate feedback and support improvements to the student experience.
- Developed leadership, stakeholder communication, and advocacy skills by acting as a link between students and the School of Engineering.

Vice President, Civil Engineering Society

Sep 2022 - Jul 2023

- Supported the leadership and delivery of society activities, including student events, industry engagement, and community building.
- Developed leadership, coordination, and stakeholder management skills while contributing to student participation and society growth.

Technical Skills

- **BIM & Digital Delivery:** Autodesk Tandem, BIM, digital twins, Common Data Environments (CDE), information quality assurance, asset data validation, ISO 19650 awareness
- **Data Science & Modelling:** Python, SQL, machine learning, data analysis, occupancy forecasting, IoT data integration, EnergyPlus simulation

Certifications

- APM Project Fundamentals Qualification (PFQ)
- BAFCFA Level 1 Coaching Certification
